DUNS:

Environmental certification system

☐ BREEAM ☐ BREEAM-SE ☐ LEED 2009 ☐ LEED version 4 ☐ Miljöbyggnad

References

Reference

Byggelit does not hold certification in environmental systems that require third-party inspection.
With regard to the environment, Byggelit has a self-monitoring programme and an annual environmental report

2. SUSTAINABILITY WORK

Company certification

☐ ISO 9001 ☐ ISO 14001

Other:

Byggelit does not hold certification in environmental systems that require third-party inspection. With regard to the environment, Byggelit has a self-monitoring programme and an annual environmental report

Östersundsvägen 59

Yannick Spruijt

Policies and guidelines

- [x] The company has a code of conduct/policy/guidelines in order to address corporate social responsibility in the supply chain, including procedures to ensure compliance with the requirements
- [ ] This has been reviewed by a third party

- [x] UN Guiding Principles on Business and Human Rights
- [x] The eight core conventions of the ILO
- [ ] OECD Guidelines for Multinational Enterprises
- [ ] UN Global Compact
- [ ] ISO 26000

If yes, which of the following guidelines have you adhered to or management systems have you implemented

Other policies/guidelines

Management system

If you have a corporate social responsibility management system, which of the following is included in your work?

- [x] Mapping
- [x] Risk analysis
- [x] Action plan
- [x] Monitoring

Sustainability reporting guidelines:

3. DECLARATION OF CONTENTS

Chemical content

Indicate the chemical content for the product as a whole. In Sweden, the concentration must be calculated at component level according to the “once a product, always a product” principle.

Is there a safety data sheet for the product?

N/A

Is there a classification of the product?

N/A

Indicate the Candidate List edition used (Year, month, has been calculated on:

For composite products, the concentration of constituent substances, day):

the entire construction product

The product is covered by the RoHS Directive:

No

Indicate the weight of the product:

640 kg/m3

Indicate the percentage of the material content declared [%]:

100

If the product contains nanomaterials that are deliberately added in order to achieve a certain function, indicate these below:

Indicate the percentage of volatile organic compounds [g/litre], applies only to Is the product registered in Basta? sealants, paints, varnishes and adhesives: Yes

Residual product from nearby sawmill

Total recycled material in product

☑ Does the product contain recycled material?

Material	Percentage before consumer stage	Weight/percentage by weight
Wood raw material	100	67.5 g

Percentage after consumer stage

0

Comment

Renewable material

Indicate the percentage of renewable material in the product (short cycle, less than 10

Indicate the percentage of renewable material in the product (long cycle, more than

90

☐ The biobased material included is a raw material tested according to ASTM test method

Is there documentation of a third-party certified system for control of origin, extraction of raw materials, manufacturing or recycling processes or similar for the raw materials (e.g. BES 6001:2008, EMS certificate, USGBC Program)? If yes, specify the system(s):

Wood raw

☑ Wood raw materials

☑ Input wood raw material is certified

What percentage is certified [%]?

90

Which certification system has been used (e.g. FSC, CSA, SFI with CoC, PEFC)?

FSC Mix90% FSC Controlled wood

Reference number:

FSC-C114587

Indicate the country of harvest for the wood raw material, and that the criteria below have been met. Country of harvesting

Sweden

☑ Does not include wood type or origin in the CITES appendix of endangered species

☐ The timber has been harvested legally and certified

5. ENVIRONMENTAL IMPACT

Environmental impact during the life cycle of the product, production stage modules A1-A3 according to EN 15804

☐ Has an environmental product declaration been produced for the product according to EN15804 or ISO14025?

What product-specific rules have been applied, known as PCR:

Registration number / ID number for EPD:

Global warming potential (GWP100) [kg CO2-eq]:

Ozone depletion potential (ODP) [kg CFC-11 eq]:

Acidification potential (AP) [kg SO2-eq]:

Photochemical ozone creation potential (POCP)

Eutrophication potential (EP) [kg (PO4)3-eq]:

Renewable energy [MJ]:

2998

Non-renewable energy [MJ]:

118

If a calculation has been made in the Green Guide, indicate the rating:

If no environmental product declaration or other life cycle analysis is available, describe how the environmental impact of the product is taken into account from a life cycle perspective:

Energy consumption is per M3 particle board produced.
We use residual products from the sawmill industry, (which would otherwise be used as fuel), add 6% binder, compress it and make boards.
In this way, it binds CO2 emissions for the service life of the board, i.e. at least 50 years, when it can be either recycled to form a new board or used as fuel.

6. DISTRIBUTION

Distribution of finished product

Does the supplier apply the Construction Pallet Return System?

N/A

Does the supplier apply a returnable packaging system for the product?

No

Does the supplier take back the packaging for the product?

No

If yes, which packaging and system:

FTI

Other information:

7. CONSTRUCTION PHASE

Construction phase

Does the product have special storage requirements?

Yes

Specify

According to our handling instructions

Does the product have special requirements for surrounding construction materials?

No

Specify

Is the supplier affiliated to a manufacturer responsibility system for packaging?

Yes

Other information:

8. USE PHASE

Use phase

Does the product require input goods for operation and maintenance?

No

Specify:

Does the product require an energy supply for operation?

No

Specify:

Estimated technical product service life:

>50 years

Comment:

Is there an energy label according to the Energy Labelling Directive?

(2010/30/EU) for the product?

N/A

If yes, indicate the label (G to A, A+, A+, A++, A+++):

Other information:

9. DEMOLITION

Demolition

Is the product prepared for disassembly (dismantling)?

No

Specify:

Does the product require special measures to protect health and the environment during demolition/dismantling?

No

Specify:

Other information:

10. WASTE MANAGEMENT

Product supplied

Is the product supplied covered by the Regulation on producer responsibility for waste electrical and electronic equipment (2014:1075)?

No

Is reuse possible for all or parts of the product when it becomes waste?

Yes

Specify:

As ceiling and wall board in undamaged condition

Is material recovery possible for all or parts of the product when it becomes waste?

Yes

Specify:

As energy during incineration

Is energy recovery possible for all or parts of the product when it becomes waste?

Yes

Specify:

As energy during incineration in approved incineration plants.

Does the supplier have restrictions and recommendations for reuse, material or energy recovery or disposal?

No

Specify:

Waste code for the delivered product when it becomes waste
03 - Waste from wood processing and production of panels and furnishings, paper pulp, paper and cardboard
0301 - 01 Waste from wood processing and production of panels and furnishings:
030105 - 05 Other shavings, chips, particles, wood and veneer, and particle boards other than those specified in 03 01 04

When the product supplied becomes waste, is it classified as hazardous waste?

No

Built-in product

Is the built-in product classified as hazardous waste?

No

Other information

11. INDOOR ENVIRONMENT

Indoor environment

☐ The product is not intended for indoor use

☐ The product emits no emissions

☐ Goods emissions not measured

Does the product have a critical moisture condition?

Yes

If yes, specify:

Climate class 1

Noise

Can the product generate its own noise?

No

Value:

Unit:

Measurement method:

Paints and varnishes

☐ The product is resistant to fungi and algae when used in wetrooms

Electric field

Can the product generate electric fields?

No

Value: Unit:

Measurement method:

Magnetic fields

Can the product generate magnetic fields?

No

Value: Unit:

Measurement method:

Emissions

The product emits the following emissions when used as intended:

Type of emission:

Formaldehyde

Measurement point 1:

Measurement method/standard:

EN 120

Result:

<8 mg/hg dry board

Measurement interval:

24 hours

Measurement point 2:

Measurement

Result:

Measurement

Other information

The product is bears the Nordic Swan Ecolabel, which means that its emissions are < 0.07 mg/m3 according to EN717-1.
